

Diabetes

IMPORTANT

1

In treating the heart area (4th intercostal, left of sternum) NEVER use a frequency other than 5 Hz.

2

Do NOT use coMra therapy on patients who have had heart transplants, who have hearts with artificial valves or who have cardiostimulators.

Treatment times given in this user guide were designed for the home user with the Delta or Palm 980 nm laser to give a conservative starting point. Treatments with the professional 905 nm laser are more intense, and therefore these treatment times may be shortened, and also the space between treatments extended further, as determined by feeling and experience.

In treating the heart area NEVER use a frequency other than 5 Hz.

Do NOT use on patients who have had heart transplants, who have hearts with artificial valves or who have cardiostimulators.

SECTION 13

ENDOCRINOLOGY 1

20 mins

Treatment time.

Using:
Delta Medical Terminal or
coMra Palm.

1 x daily
for 21 x days

Allow 3 weeks rest before doing further treatments until the blood sugar level reaches normal and insulin is no longer needed.

Thereafter do a full course of the treatment every 3 months, or whenever needed, so as to maintain the correct blood sugar levels.

• DIABETES MELLITUS

TREATMENT POINT	⌚ MINS	⚡ HZ
1 4 th intercostal, left of sternum (only once per day)	1	5
2 Left sternocleidomastoid, above clavicle		50
3 Epigastrium	2	5
4 4 points on the pancreas, along the transpyloric plane	2 per point	
5 Midway between transpyloric plane and umbilicus	2	
6 Scan both sides of vertebral column from below scapula to mid-back	3 per side	1000

i Under NO circumstances should medical supervision be suspended before full recovery has been achieved. If insulin has been prescribed this should also NOT be stopped until a medical doctor confirms that this is no longer necessary.

Treatments with the professional 905 nm laser are more intense, and therefore these treatment times may be shortened, and also the space between treatments extended further, as determined by feeling and experience.
